

LETTER OF RECOMMENDATION

Lisbon, August 19, 2026

To Whom It May Concern,

It is my pleasure to recommend David Matos, who completed a curricular internship under my supervision at CELFINET - CONSULTORIA EM TELECOMUNICAÇÕES, S.A., a Cyient Group company, as part of the requirements for completing his bachelor's degree in computer science at the Faculty of Sciences of the University of Porto.

During the period in which he joined our research and development team, David stood out for his autonomy, proactivity, sense of responsibility, and excellent learning ability. From an early stage, he demonstrated a strong capacity to adapt to a new environment, understand complex challenges, organize his work effectively, and consistently deliver results.

Throughout the internship, he participated in the development of a new software library, which is currently used by the research and development team for the analysis and exploration of telecommunications network data. The work he carried out demonstrated solid technical skills, as well as a strong focus on software quality, organization, and the adoption of good engineering practices in the solutions implemented.

In addition to his technical capabilities, I would like to highlight his excellent communication skills, both written and verbal. David interacts easily with different stakeholders, communicates clearly, and consistently demonstrates a mature, collaborative, and responsible professional attitude.

Throughout my career, I have had the opportunity to supervise several interns and young professionals. David distinguished himself through his combination of autonomy, ability to learn quickly, and capacity to deliver high-quality results from an early stage. He stood out above the typical profile of a recent graduate, not only because of his technical competencies, but also due to his maturity, initiative, and the way he embraced the responsibilities entrusted to him.

For all these reasons, I recommend David Matos without reservation for professional opportunities in software development and technology-related roles. I am confident that he will be a valuable asset to any organization.

Yours sincerely,

Marco Sousa

Research Lead

Celfinet, a Cyient Company
